

Exercise 2.2

Solution:

Iterator upto(startInt : **value** Integer, endInt: **value** Integer): integer ;

Begin

While startInt < endInt **do**:

Yield startInt;

 startInt := startInt + 1;

end;

end;

main():

variable

 x,y: integer;

begin

 x := 10;

 y := 20;

while I: integer in upto(x,y) **do**:

 print (i);

end;

end;
